Subject: RE: 1,2,3,4,7,8-HxCDF Errata

---

Hi Hunter, will there be a comment period on this and can you give us any info on where the mistake was before the errata sheet comes out?

Let me know.

Thank you.

Joan

Hello Portland Harbor Superfund Site Project Coordinators,

In implementing remedial designs at the Portland Harbor Superfund Site, an error on Table 6 and Table 21 of the Record of Decision was discovered. EPA is planning to issue an Errata to make the correction in the coming months. The Principal Threat Waste threshold value of 0.04 µg/kg for 1,2,3,4,7,8-hexachlorodibenzofuran (HxCDF) should be 0.4 µg/kg. We are sharing this information in advance of the Errata in order to be transparent and good stewards during remedial design. Please reach out if you have any questions.

Thank you,

Hunter Young
